Translation & Implementation Plan

Project title:	
Output *Intervention / innovation / information*	*Will it be translated into a practice, policy, program, process, website, tool, etc. How will the evidence-informed product be implemented?*
Hypothesis and anticipated findings	
Expected benefits in alignment with the research agenda. *e.g., practice improvement*	*What will be the outcome of implementation? Who will implementation benefit and how?*
End Users	*Who will develop and implement research-informed practices, policies, programs, processes? e.g., detention centre caseworkers.*

Engagement strategy

Objective	Format	Channel	Key messages	Communicator	Timing
e.g., share finding to inform/increase knowledge	*How will you produce/present the information? This is your 'outputs'*	*How will you deliver the information to end-user/ audiences?*	*What are the 3 most important things the end user/audience need to know or remember?*	*Who would be most influential speaker/presenter for the identified end-user/ audiences?*	*What is the best year/ month/date/ to share this? Does it coincide with or avoid existing forums/meetings or events?*
e.g., implement new clinical practice					
e.g., influence policy change					
e.g., inform development of new NGO program/project
